

# Paint Booth Coating

Water Reducible Strippable Paint Booth Coating

ZOLATONE<sup>®</sup>

## Features:

- Easy Application
- Quick Coverage
- Water Based

## Advantages:

- Finish Faster
- Use Less Material
- Low VOC

## Benefits:

- Increased Productivity
- Saves Money
- Eco Friendly

## Compare To:

# Paint Booth Coating

Water Reducible Strippable Paint Booth Coating

## About ZT-W Series

ZT-WW804 Bright White is a Low VOC Water Reducible Strippable Booth Coating created from new technology resin systems designed to be more user friendly than other products on the market. The high pigment content of the Bright White provides for faster, higher hiding power that will reduce the amount used for each application. The additives used allow for resistance to strong solvents used in paints but provide an easy release when cleaning and stripping the coating so it peels in one easy to clean piece without splintering.

## Tech Specs

Color:	Bright White
Mix Ratio:	Ready to Spray
Weight Solids(RTS):	48%
Film Build:	3-4 dry mils per coat
Coverage:	150 sq ft./gal
Dry Time:	1 Hour
Pot Life:	No Pot Life
V.O.C.	0.31 lbs/gal

## Instructions

### Mixing Instructions:

Shake or open the container and stir with stick . Product is very thick and heavily pigmented and must be completely mixed prior to spraying.

### General Application:

The surface must be free from dirt, oil, grease and other contaminates. Surface must be completely dry, free of any moisture. Booth coating can be applied to metal, plastic, fiberglass or over old dry paint coatings. Apply a minimum of 2 coats to achieve the maximum coverage. Spraying with airless equipment using a 5-15 tip provides the fastest and easiest application. Product should be applied until complete hiding is achieved. If you can still see the substrate through the coating, it is not at proper millage. If spraying with conventional air spray equipment then multiple passes will have to be made to achieve coverage.
